

ABSTRACT

5 The present invention aims to provide a method for
producing a resin fine particle by which a resin fine
particle with high sphericity and even particle diameter
can easily be obtained, a resin fine particle obtained by
the method for producing a resin fine particle, a
polyolefin type resin fine particle, a polyester type resin
10 fine particle, and an acrylic resin fine particle.

The present invention is a method for producing a
resin fine particle, which comprises a step 1 of heating
and/or pressurizing a mixture of a resin and a fluid in
which the resin is not dissolved in a normal temperature
15 and normal pressure for making at least one component of
the fluid supercritical state or subcritical state and a
step 2 of decreasing the temperature of the fluid for
releasing the pressure.
